

Dear Families,

Summer is a wonderful time to regroup, refresh and rejuvenate ourselves! It is also a wonderful time to grow and keep our skills fresh! It is in this spirit that we are requiring all high school students to spend some time this summer keeping their math skills fresh and up to par.

Students should find the course they have just completed and complete the packet provided. With the exception of those students entering AP Calculus in the fall, all of the problems have answers provided so that students can check their own progress. However, the work shown to complete each problem will be collected and is due to their respective math teacher.

Here are a few helpful websites that can help your son/daughter improve their math proficiency over the summer:

[www.khanacademy.org](http://www.khanacademy.org)

[www.purplemath.com](http://www.purplemath.com)

[www.mathplayground.com](http://www.mathplayground.com)

YouTube.com sites:

- KristaKingMath
- MathMeeting
- Mathispower4u

If you have any questions or concerns about the summer assignments, please do not hesitate to call or email.
